## **A MICROFOREST IS COMING TO**

# **BLAXLAND PARK**

We're creating a native microforest at Blaxland Park- a small, dense planting of native trees and shrubs that mimics a natural forest and establishes quickly.

That means extra shade and cooling on hot days, habitat for birds and insects, cleaner air, and a greener, more welcoming park for everyone. We are in the process of securing approval from the ACT Government, who have requested a design concept and community consultation - which starts here!

---

### **COME TO A SITE TOUR & HAVE YOUR SAY**

Walk the site with the project team, hear what's proposed, and have your say. Everyone who attends receives a feedback form – drop it anonymously at Gryffons or scan the QR code to submit online. Feedback will be open for 3 weeks after the tours.
